Your Gym, Live In Five Minutes

One six-character gym code runs everything. Set it up once and your fighters join themselves.

GETTING THE APP

1. Go to **apex-corner.com/get** on your phone or iPad. It takes you to the App Store or Google Play. Bout IQ is free to download.
2. Open Bout IQ and tap **I'm A Coach**, then **Head Coach**. Enter your name, email, a password and your gym's name, then tap **Create Account**.
3. Check your email and tap the link. On iPhone and iPad you can use **Continue with Apple** instead: tap it, choose **I'm A Coach**, type your gym name and tap **Set Up My Gym**.
4. You will see **Gym Created!** and **Your Gym Code**. That code IS your gym. It is always in **Settings** under **Your Gym Code**: tap it to copy, or tap **Send to your fighters**: your phone's share sheet opens with the code and the download link already written, so pick WhatsApp or wherever your fighters are.

SETTING UP YOUR GYM

5. **Your own details.** In **Settings** fill in Date of Birth, Sex, Height and, if you know it, Max Heart Rate. Heart-rate zones and calories are built from these.
6. **Other coaches.** In **Settings** under Coaching Staff tap **Invite a Coach**: name, email and role, then **Send Invitation**. Or they tap **I'm A Coach**, then **Assistant / Staff**, enter your gym code and pick their role.
7. **Let them in.** A coach who joins with the code shows as **waiting** in **Manage Coaching Staff**. Tap **Let in**. Nobody sees your fighters until you do.

Coach Roles

Head Coach sees and runs everything. **Assistant Coach** views and logs for all fighters. **Strength & Conditioning**, **Running Coach** and **Nutritionist** see only their own kind of session. Change a role any time with **Edit Role**.

Two Head Coaches

A gym can have two head coaches with full control. The second one signs up as Head Coach with the same gym code. There is no switch to promote an assistant; keep it simple and safe.

Add Your Fighters

Two ways in. Both end with the fighter on your Team screen, ready to train.

ADDING FIGHTERS

1. **Invite one by one.** On the **Team** tab tap **+ Invite**. Enter their name, email, weight class and stance, then **Send Invitation**. The email carries the download link, your gym code and step-by-step instructions, and their profile is already set up when they arrive.
2. **Or share the code.** Put the gym code on the noticeboard or send it from **Settings**. The fighter taps **I'm A Fighter**, enters the code and they are on your Team. No admin for you.
3. **Fighters who already train alone** keep every session they have logged. Joining your gym simply moves them across; nothing is lost.

If A Fighter Sees "Is Full"

Every plan has a number of fighter places (see Plans and Seats). When they are all taken, a new fighter is told the gym is full and to ask you to upgrade. Upgrade on apex-corner.com and they try the code again.

WHAT YOU SEE FOR EACH FIGHTER

4. **Team** lists everyone with weight class, stance and the weight they make. Tap a fighter to open their **Home**: this week's training, readiness, days out from the fight, and buttons for **Weigh-In**, **Book**, **Timer** and **Program**. (Roadwork is the fighter's own: you cannot run someone else's run.)
5. Along the bottom: **Nutrition** (what they ate against their target), **Health** (resting heart rate, sleep, recovery) and **Progress** (trends week by week). **Message** opens a private chat with that fighter. **Report** builds a PDF of their last two weeks to share.
6. **The Timer is your ring-apron clock.** Open a fighter, tap **Timer** and turn the phone sideways. With a chest strap on the fighter you get live heart rate under the clock and a round-by-round read at the final bell, including how far they came back down in the rest.
7. **Side By Side** (on the **Roster** tab) is the group version: one iPad, one clock, a tile per fighter on their own chest strap, and at the final bell a sheet showing who worked easier and who recovered faster. It comes with a coach plan. A fighter with their own account can be a guest on the board with **Join Board** and keeps the session.
8. **Calendar** shows sessions booked ahead and training logged. **Book** on a fighter's Home books a session for a day and time. **Build Program** saves a week you can load for anyone.

Coaches Train Too

Your own sessions, your own numbers, the same app your fighters use.

LOGGING YOUR OWN TRAINING

1. On the **Roster** tab tap **My Training**. It is the full fighter experience for you: log sessions, runs with GPS, food, weight, health and progress, and your own camp with a date to aim at.
2. Your own max heart rate drives your zones. Set it in **Settings**, or let a chest strap learn it: the app keeps the highest it has ever held.

PLANS AND SEATS

A fighter starts free and the round timer stays free. A chest strap with live heart rate, more AI meal scans and the weight-cut planner are Solo Pro. A gym plan gives every fighter on it all of that, plus everything on this guide for you. Gym plans are bought on apex-corner.com, not inside the app; your plan shows in **Settings**.

PLAN	WHO	PER MONTH	PER YEAR
Solo Pro	One fighter on their own	**£3.99**	**£39.99**
Undisputed	One fighter, voice logging and 15 AI scans a day	**£7.99**	**£79.99**
Coach Starter	Up to 5 fighters	**£16.99**	**£169.99**
Gym Starter	Up to 10 fighters	**£31.99**	**£319.99**
Gym Pro	Up to 25 fighters	**£64.99**	**£649.99**
Gym Elite	Up to 50 fighters	**£119.99**	**£1,199.99**

A year costs ten months. Gym Undisputed adds voice logging for the whole gym: £24.99 / £44.99 / £99.99 / £174.99 a month for 5 / 10 / 25 / 50 fighters. Coaches do not use a fighter seat.

HELP

Free Setup Call

Thirty minutes on video and we set your gym up with you: **calendly.com/hello-apex-corner/30min**. Also in **Settings** as **Book a setup call**.

Talk To Us

Settings → **Help on WhatsApp** opens a chat with the team. Or email **hello@apex-corner.com**. Anything odd, send a screenshot; fixes usually ship within days.

Week One, Do These Three

1. Gym code on the noticeboard so fighters join themselves. 2. Run one sparring session on the Timer with a strap and show the recovery numbers at the end. 3. Open **My Training** and log your own session; you will understand the app the way your fighters see it.
