In The App In Two Minutes

Train on your own, or join a gym with a code. Either way, every session you log is yours to keep.

GETTING THE APP

1. Go to **apex-corner.com/get** on your phone. It takes you to the App Store or Google Play. Bout IQ is free to download.
2. Open Bout IQ and tap **I'm A Fighter**: train on your own, or join a gym with a code. Enter your name, email and a password, then tap **Create Account**.
3. Check your email and tap the link. On iPhone and iPad you can use **Continue with Apple** instead and skip the email.
4. **Got a gym code from your coach?** Type it in the **Gym Code** box when you sign up. You land on their team with your profile already set up. Started solo? You can join a gym later from **Settings**; nothing is lost.

SETTING YOURSELF UP

5. **Your details.** In **Settings** under **Athlete Profile** fill in Date of Birth, Sex, Height, **Your Weight** and, if you know it, Max Heart Rate. Your calories and heart-rate zones are built from these, so a minute here makes every number yours rather than an average stranger's.
6. **Your fight.** On **Home** tap **Camp** and set a **Fight Date** and your **Make Weight**. Home then counts the days down and shows where your weight sits against the limit every morning.
7. **Your max heart rate.** If you don't know it, leave it: the app uses a sensible default from your age, and if you ever train with a chest strap it keeps the highest it has seen.

What Every Account Gets

Every session type logged, your full history for ever, the round timer, GPS runs and bike rides, weigh-ins, meals and water, the Health tab, and your week added up. A fighter starts free and the round timer stays free.

Your Training Is Yours

Join a gym and your coach sees your training. Leave a gym and every session comes with you. Nothing you log is ever locked behind a plan.

Your First Week

Start on your Home screen. This is what to do in week one.

FIVE THINGS TO DO

1. **Log a session.** Tap **+ Log Session**. Pick **Boxing**, **S&C**, **Road**, **Nutrition** or **Recovery**, fill in the rounds or the minutes, and save. It takes seconds and your history starts with the first one.
2. **Run the timer.** Tap **Timer**, set your rounds, round length and rest, and go. Turn the phone sideways and prop it up: green means box, red means rest, and you can read it from across the gym.
3. **Road.** On Home tap the **Road** tab, then **GPS Run** or **Bike Ride**. Phone in your pocket, off you go. At the end you get the distance, your pace, your fastest and slowest kilometre and calories, and it saves to your log. **Gym Cardio** for the machines, and **Roadwork** (a run built like a fight, round by round, with spoken cues) are Solo Pro.
4. **Weigh in.** Tap the **Nutrition** tab, type your weight under **Log Bodyweight** and tap **Save Weigh-in**, each morning before you eat. (**Your Weight** in Settings saves the same weigh-in.) If you have set a fight, Home shows the gap to the weight you make.
5. **Look back.** On Home, each tab (**Boxing**, **S&C**, **Road**, **Nutrition**, **Recovery**) lists the sessions you have logged; tap one to see the detail or add a photo. The **Progress** tab adds the weeks up.

NUTRITION, HEALTH AND PROGRESS

Nutrition

Log meals, water and your morning weight against a daily target built around your fight weight. Tap **+ Add Food**, then **Photo**, take a picture of your plate and tap **Continue**: the app works out the macros from the picture. Three scans a day on the free app.

Progress

Your week added up: sessions, rounds, kilometres and **Load**, a count of how much work you did. Tap any day to see just that day.

Health

Resting heart rate, HRV and sleep, read from your phone's health data and shown beside your training so you can see how you are recovering. The Health tab comes with every plan. Live heart rate from a chest strap and the weight-cut planner are part of Solo Pro (see Plans).

Training At A Gym

One six-character code from your coach puts you on their team.

JOINING YOUR GYM

1. Ask your coach for the gym code. In **Settings** under **JOIN A GYM** enter it and tap **Join**. Everything you have logged comes with you.
2. **What your coach sees.** Your sessions, weigh-ins, roadwork and progress, the same screens you see. They can **Book** a session into your calendar and **Message** you privately in the app.
3. **Side By Side.** When your coach runs the group board on an iPad, tap **Join Board** to be on it from your own account. The session saves to your log.

If The Gym Says It Is Full

Every gym plan has a number of fighter places. If they are all taken you will be told the gym is full; ask your coach, and try the code again once they have added places. Your solo account keeps working in the meantime.

PLANS

A fighter starts free and the round timer stays free. Solo Pro adds live heart rate from a chest strap, the weight-cut planner, Gym Cardio, Roadwork and more AI meal scans. If your gym is on a gym plan, you get all of that through your coach and pay nothing yourself.

PLAN	WHO	PER MONTH	PER YEAR
Free	Log everything, full history, round timer, GPS runs, weigh-ins, Health tab	**£0**	**£0**
Solo Pro	One fighter on their own	**£3.99**	**£39.99**
Undisputed	One fighter, voice logging and 15 AI scans a day	**£7.99**	**£79.99**

A year costs ten months. Plans are bought inside the app; your plan shows in **Settings**.

HELP

Talk To Us

Settings → **Help on WhatsApp** opens a chat with the team. Or email **hello@apex-corner.com**. Anything odd, send a screenshot; fixes usually ship within days.

Week One, Do These Three

1. Fill in your details in **Settings**. 2. Log your next session the day you do it. 3. Run one session on the **Timer** with the phone sideways and see how it feels.
